School of Computer Science

COMP20050: Software Engineering Project-II

Submission Details and Rubric for Sprints 1-4

Module Coordinator	Ravi Reddy Manumachu
Email	ravi.manumachu@ucd.ie

Submission Details

The submission details for each sprint follow:
- Submit a zip file with the name,
  <yourgroupnumber>_<yourgroupname>_sprint<N>.zip,
  Where **<N>** stands for the sprint number.
- A **report** in PDF format (1 page) including:
  - Group number, Group name, and Student IDs.
  - GitHub link.
  - State the relative amount of work done by each group member. If the workload distribution is not evenly divided among the members, please explain why.
  - **If the workload distribution is even, state "All members contributed equally".**
- An **executable JAR file** of the board game.
- A **document** on what features have been developed and tested.
  - Note the software implementation for a sprint should have all the features planned in the sprint working and tested well.
  - Specify any deviations from the project plan such as what features have been removed or what new features were added.
- **Trello Kanban Board** for the sprint for each team member.
- A **document** containing the following information:
  - JDK used to compile and build the JAR file.
  - How to launch and play the board game.

Rubric

Assessment Criteria for Sprints 1-4 (Weight: 10 Marks)	
Criterion	Penalty (Marks)
An executable JAR file **is not submitted.**	– 10

Document containing the JDK version used to build the JAR and instructions on how to launch and play the board game **is not submitted.**	-3
A promised feature (in the project plan) **not implemented**. No satisfactory explanation or reason given for the missing feature.	-3 (for each feature)
From Sprint 3 onwards, one or more tests (using JUnit or any other tool) are mandatory. **Tests are missing.**	-3
In the event of sprint modifications, you should submit a revised project plan (product backlog). Revised project plan is **not submitted**.	-3
A feature (in the project plan) has defects and **is not working**.	-3 (for each feature)
For an individual team member, GitHub or Trello Kanban Board to track features is **not submitted**.	-3

Final Comments

If there are any sprint modifications (features removed or added), specify the modifications. You should also submit the revised project plan.
